My workshop is EZDRIVE CAR CARE. Using Ramp from 3 years now. I was one of the first customers for them and hence i have seen the software grow from nothing to everything for garages. Besides being the best software for vehicle workshops, the people involved in the company are best! VERY TRUSTWORTHY PEOPLE AND YOU CAN BELIEVE THEM FOR ANYTHING! They have delivered everything that they promised. Their service is excellent and have really helped my employees a lot!

What can I say but WOW!!! RAMP is by far the BEST Garage Management Software that is currently available in the market. Made in India by a team of Software Wizards based in Hyderabad these guys know how to cater to an Automotive Service Providers needs, be it in India or anywhere else in the WORLD!!!. From Inventory & Billing to Daily/Weekly/Monthly Reports and even filing your Tax Returns under the new GST regime, these guys have their systems in place that can manage and improve all aspects of YOUR BUSINESS. Amit & Team keep up the good work... YOU MAKE INDIA PROUD!!!

I have used various software . But the ease and flexibility of ramp software is really amazing. Using for the last 8 month and has seen the software grow with lots of additional features month on month. Hope to see more on the report. All the best guys. This software going to rock India in the days to come

They have made a perfect software for the workshop. I don't think any thing they missed. The easiest software in market for workshops in India. I am using it for more than 4-5 months and found it best from any other software available, the best I like is that it send's sms instantly to customers whenever is required. Which makes a small workshop feels systematic to customers.

Good job guys

My Workshop is in New Delhi and I'm using this Software for pretty long time now. And it has made my life pretty much easier in terms of handling bill, service reminders, petty cash work, managing stock, employee roles etc. Thumbs up to the team of RAMP, they are very helpful and enthusiastic about their work. I would certainly recommend Workshop owners to get this software!! My best wishes are with you RAMP.

Very complete app and very easy. Excellent customer support. No other product people understood my product as ramp did. They spent a lot of time with us to understand our challenges and when they presented their product to us, I found it to be absolutely what I needed. Implementation was also very easy as I could train people in max 10-15 mins time.

Ramp is very user friendly, almost no training required. It's simple but a very powerful application to manage all the workflows and accounting for Automobile workshops.

The simplest and the most effective software I have used until date. Multi brand garages function a bit different than the dealer garages. RAMP has covered almost all the aspects of a multibrand garage. They have understood in detail how exactly we work and made this product. Keep up the good work. Wish them all the best.

A very happy customer,
Rohit.
